

CONFINED SPACE RESCUE

All Liberty Energy Services personnel are highly trained and certified, and consistently focus on proper safety procedures to ensure that every worker on a job site returns home safely.

It's about more than completing the work; it's about the goal of keeping every worker safe at all times.

Our highly trained industrial rescue personnel perform in confined spaces, as well as high-angle scenarios defined by OSHA criteria and are first-aid, CPR-, and EMR-certified.

Liberty Energy Services performs in dangerous atmospheres that require breathing air equipment (SAR and SCBA), meeting OSHA requirements.

ON-SITE TRAINING COURSES

- Confined Space Awareness
- Confined Space Entrant/Attendant
- Confined Space Gas-Free
- Confined Space Rescue

All courses follow CFR regulations. Additionally, Liberty Energy Services manages orientations and on-site hazard awareness for all site personnel.
